

IBC

Non IBC Signatures

Signing by TA:

 $V = sH_1(m)$

(PRIOR ART) Figure

Party B has identity ID and a secret S_{ID} from TA where Signing by Party B $h = H_2(m||r)$ where $r = t(S_{\text{ID}}P)^k$ Signatures $U = (k-h)S_{\mathrm{ID}}$ $S_{\text{ID}} = sQ_{\text{ID}}$ and $Q_{\text{ID}} = H_1 \text{ (ID)}$ $V = m \oplus H_3(t(sP, rQ_{\text{ID}}))$ Decryption by party B Encryption by party A Encryption with secret r U = rP

 $m = V \oplus H_3\left(t(U,S_{\text{ID}})\right)$ Verification by third party Check: $t(P, V) = t(sP, H_1(m))$

Verification by third party $r' = t(U,P)*t(Q_{\mathrm{ID}},sP)^{h}$ Check

 $h = H_2(m||r')$
